Deepki Acquires EVORA Global and Metry, Creating a Global Powerhouse in Real Estate Intelligence

Combination brings together market-leading technology, automated energy data and world-class real estate expertise to help grow asset value and minimize climate risk.

LONDON, UK — August 6, 2026 — Deepki today announced its acquisition of EVORA Global, one of the world's leading sustainability consultancies and its energy data collection subsidiary Metry, bringing together three market-leading capabilities - technology, automated energy data collection and real estate expertise - in one global business. Marking Deepki's fifth strategic acquisition, the deal cements its position as the global market leader.

Real estate is entering a new era of asset decision-making. Energy volatility, regulation, climate exposure and the growing electrification of buildings are changing the economics of portfolios. Investors increasingly need to understand not simply how an asset is performing today, but where to invest, what to improve and where future value and risk will emerge.

Vincent Bryant, CEO and Co-founder of Deepki:
"Real estate professionals need clarity to make fast decisions, protect liquidity, and drive asset value. By pairing Metry's automated data engine with EVORA's end-to-end investment advisory, Deepki enhances its SaaS platform to give our clients an unmatched co-pilot. Together, we empower real estate leaders to navigate deal due diligence, optimize energy strategies, and unlock measurable portfolio value from capital raise to exit."

Better Data, Stronger Expertise, Faster ROI
The combined offering expands Deepki's ability to help customers improve the financial and environmental performance of their portfolios, bringing together three critical capabilities:

- **Trusted data at a greater scale:** Metry strengthens Deepki's automated data collection in the Nordics, reducing manual work and providing a stronger foundation for decisions.
- **World-class expertise to turn insight into action:** As a full-lifecycle investment partner, EVORA brings deep, specialized capability that includes transaction due diligence, asset assessments, and active energy procurement. This expertise directly complements Deepki's platform and services and significantly strengthens combined market leadership across the US, UK, and Europe.
- **Intelligence built for real estate:** By combining EVORA's and Metry's capabilities with Deepki's purpose-built technology and AI, portfolio data is transformed into actionable intelligence, providing comprehensive support from automated data collection to implementation, to accelerate asset performance and deliver a faster ROI.

Paul Sutcliffe and Ed Gabbitas, Co-founders of EVORA Global:
"*Joining forces with Deepki is about delivering unprecedented value, speed, and clarity to our global clients. By uniting top consulting talent with the market-leading AI-driven sustainability platform, we are equipping the real estate industry with the exact tools and expertise they need to maximize portfolio ROI and navigate complex transitions with absolute confidence*."

Seamless Continuity

EVORA's consulting team will operate alongside Deepki under a co-sold model, giving clients direct access to award-winning consulting teams alongside their software subscription. EVORA clients will gain access to Deepki's market-leading platform and expanding AI capabilities, while the SIERA platform database will be migrated seamlessly onto Deepki's platform, ensuring continuity of service and enhanced analytical capabilities for all existing users. Metry's technology will become an important part of Deepki's data infrastructure, further strengthening automated data collection for clients across multiple markets.

About Deepki

Founded in 2014, Deepki is the market-leading AI-driven sustainability platform for real estate. With the acquisition of EVORA Global and its subsidiary Metry in July and August 2026—marking Deepki's fifth strategic deal alongside Fabriq, Nooco, Sobre, and AI pioneer Camion Energy — Deepki provides institutional real estate owners, investment managers, and lenders with an unmatched, end-to-end intelligence ecosystem.

By unifying automated meter-level data collection, agentic AI, SaaS software, and top-tier ESG consulting, Deepki enables owners, investors, and occupants to manage risk, improve the sustainability and financial performance of their assets, and meet growing regulatory requirements with data-driven insights.

Deepki holds both ISAE 3000 Type II and SOC 2 Type II reports, guaranteeing data security, credibility, and auditability to financial reporting standards. Operating across 95+ countries with a team of over 400 employees, Deepki currently monitors more than €4 trillion in assets under management (AUM) across 60+ asset types for over 600 global clients, including Generali Real Estate, PGIM, and SwissLife Asset Managers. About EVORA Global

Founded in London in 2011 and acquired in 2026 by Deepki, EVORA Global is a Deepki solution supporting institutional real estate investors with end-to-end ESG strategies, risk assessments, decarbonization pathways, and regulatory disclosures across the entire asset lifecycle. In 2024, EVORA acquired Metry AB, a leader in environmental data collection connecting directly to fiscal meters across Northern Europe.
